

Technical parameters

The nozzle is primarily designed for use in air guns, but is also suitable for other applications. It has been designed with an emphasis on minimizing noise while maintaining high efficiency.

Medium	compressed air filtered
Working pressure	max 8 bar
Pneumatic connection	R1/4"
Material	aluminium

Value	2 bar	4 bar	6 bar
Air consumption [ln/min]	115	150	195
Nozzle noise level [dB]	64	70	76
Nozzle force [g]	90	157	225

Air flow diameter [mm] at 6 bar	
Measurement distance [mm]	Air cone diameter [mm]
100	20
200	48
300	85
